

HR Workforce Analytics

Executive Project Report

Data-Driven Insights | June 2026

500 Employees · 8 Departments · 8 Office Locations

About This Report

This report presents a comprehensive analysis of workforce data collected across four key HR domains: Employee Demographics & Workforce Composition, Attrition & Retention Patterns, Employee Engagement & Wellbeing, and Learning & Development Outcomes. The underlying dataset encompasses 500 employee records and spans multiple analytical dimensions including salary, tenure, training performance, and engagement scores. The findings are visualised in a Power BI dashboard and summarised here for executive review and decision-making.

Table of Contents

1. Workforce Overview & Demographics
2. Attrition & Retention Analysis
3. Employee Engagement & Wellbeing
4. Learning & Development
5. Strategic HR Action Plan
6. Key Takeaways & Recommendations

1. Workforce Overview & Demographics

The organisation employs **500 individuals** across eight departments and eight locations. The workforce is predominantly full-time (81.4%) with a balanced gender distribution and strong educational credentials.

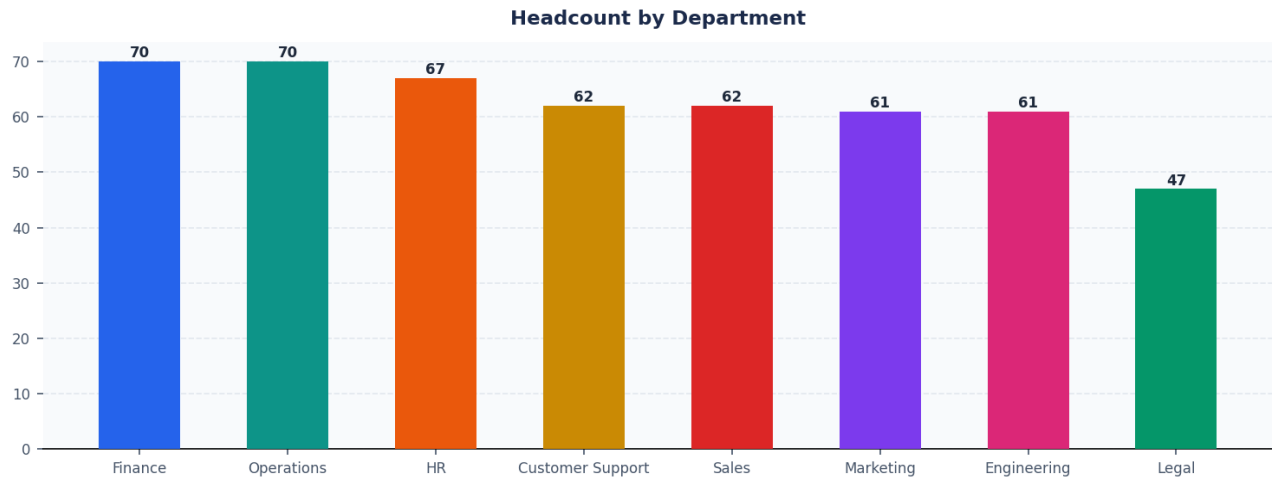

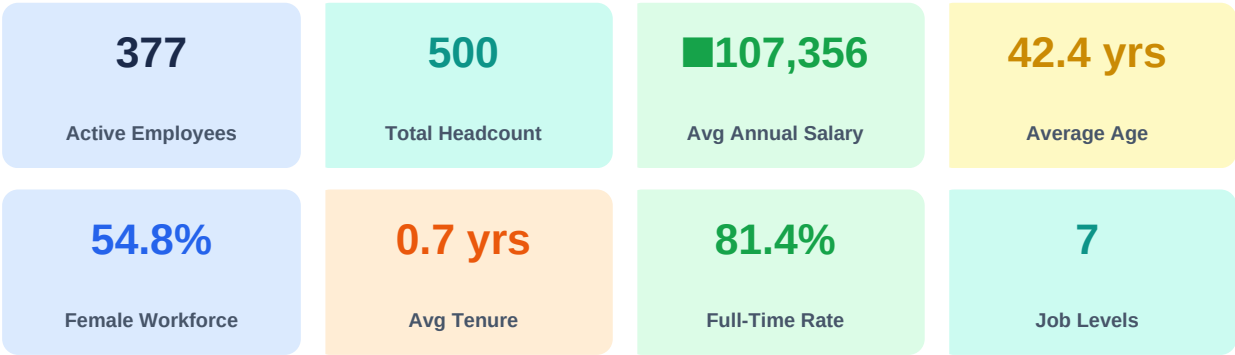

Figure 1: Employee distribution across departments

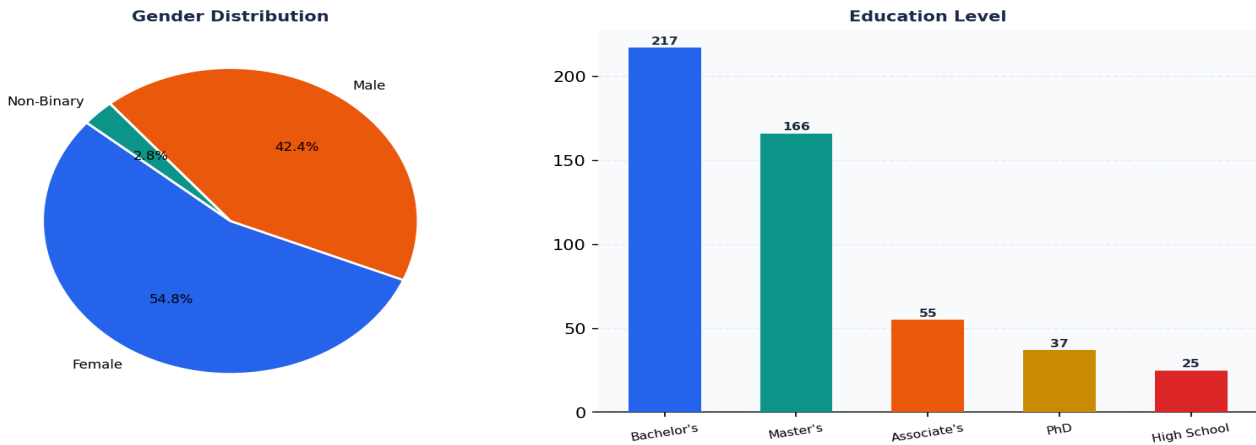

Figure 2: Gender distribution (left) and education breakdown (right)

Workforce by Ethnicity & Location

Ethnicity	Count	Share
White	214	42.8%
Asian	139	27.8%
Hispanic	73	14.6%
Black	66	13.2%
Other	8	1.6%

Location	Count	Share
New York	67	13.4%
Chicago	66	13.2%
Atlanta	66	13.2%
Boston	64	12.8%
San Francisco	61	12.2%
Austin	61	12.2%
Remote	61	12.2%
Seattle	54	10.8%

- **Key Insight:** White (42.8%) and Asian (27.8%) employees form the majority. New York, Chicago, and Atlanta together account for ~40% of the workforce. The young average tenure (0.74 yrs) reflects a recently-expanded headcount.

2. Attrition & Retention Analysis

Out of 500 employees, **123 have exited** the organisation — an overall attrition rate of **24.6%**. Voluntary resignations dominate at 50.4%, followed by terminations (29.3%) and retirements (20.3%). Low compensation is the single largest driver of departure.

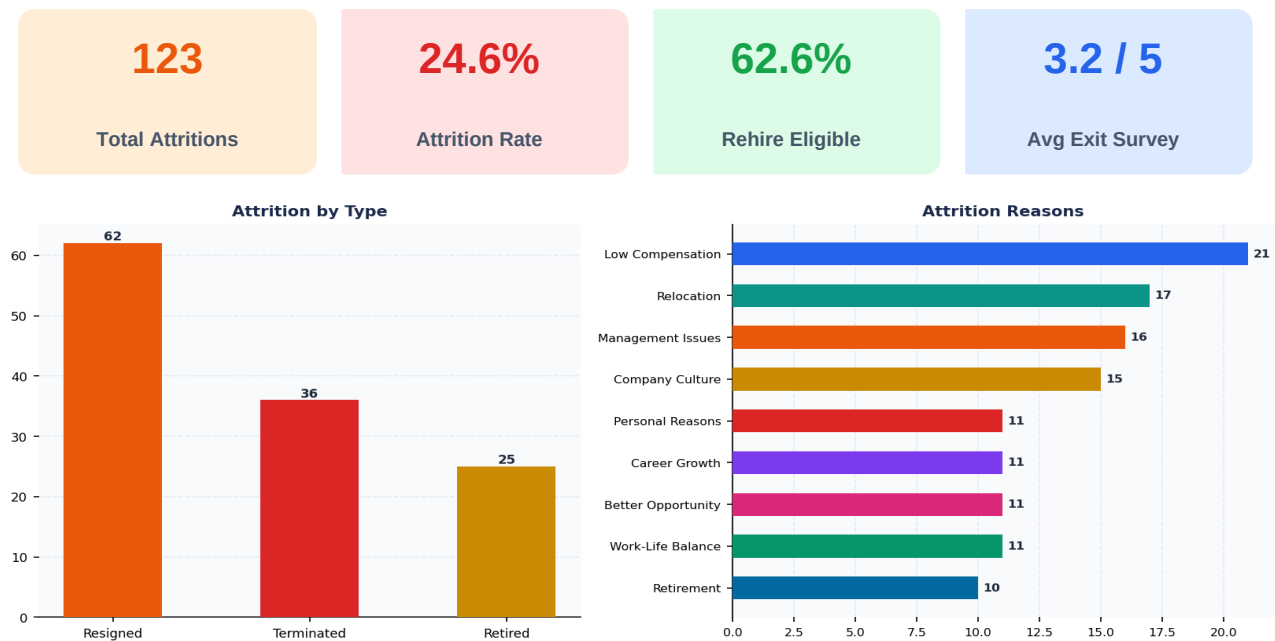

Figure 3: Attrition type (left) and reason breakdown (right)

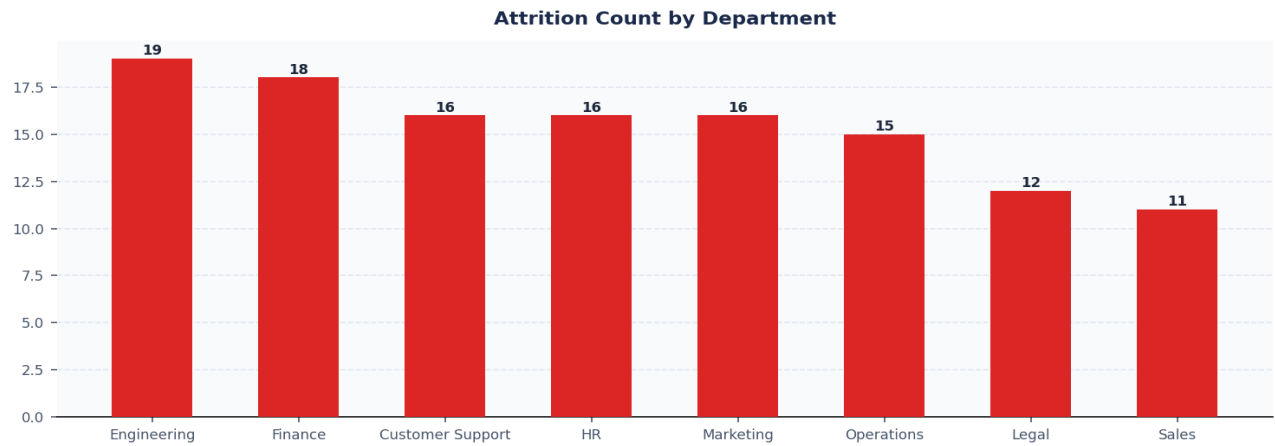

Figure 4: Number of exits per department

Critical Finding: Engineering and Finance lead attrition with 19 and 18 departures respectively. Low Compensation (17.1%), Relocation (13.8%), and Management Issues (13.0%) are the top three cited reasons. 62.6% of departing employees are eligible for rehire, indicating the exits are largely circumstantial rather than conduct-related.

3. Employee Engagement & Wellbeing

Engagement surveys were completed by **300 employees** across all departments. The overall picture indicates a **moderate engagement level of 3.0/5.0** with notable risk: 21% of surveyed employees are classified as High Risk of Leaving.

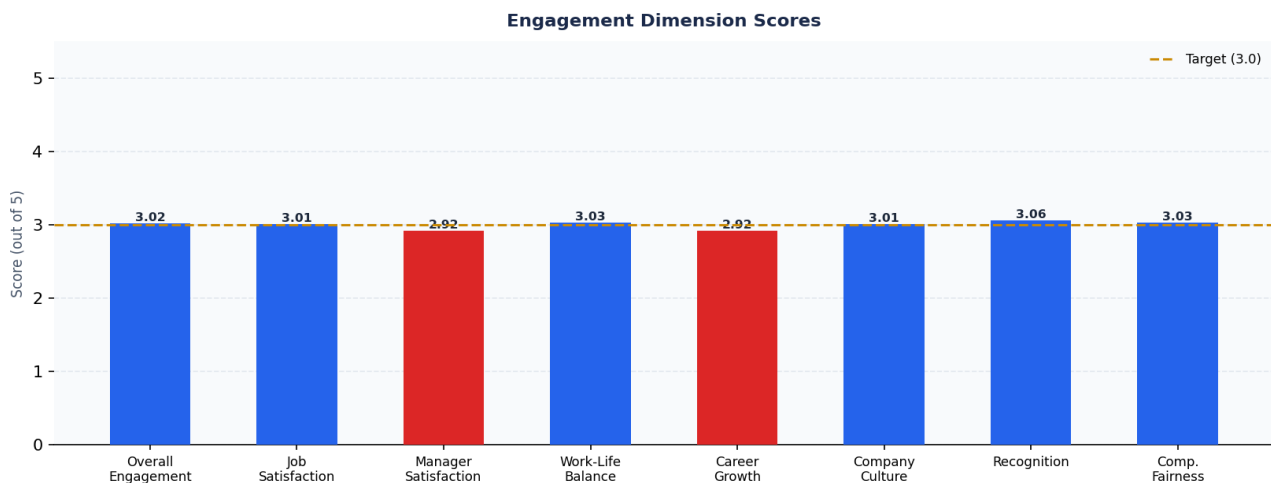

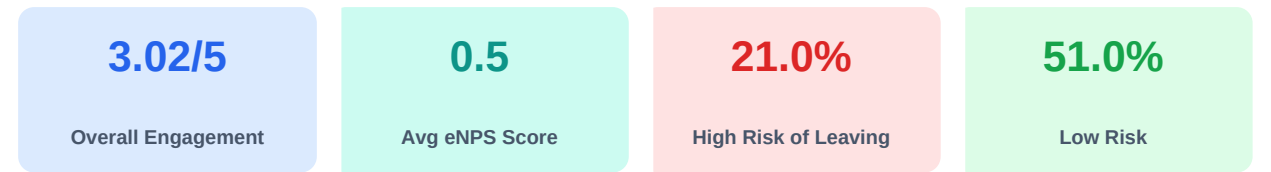

Figure 5: Average scores across all engagement dimensions (blue = at/above target, red = below target)

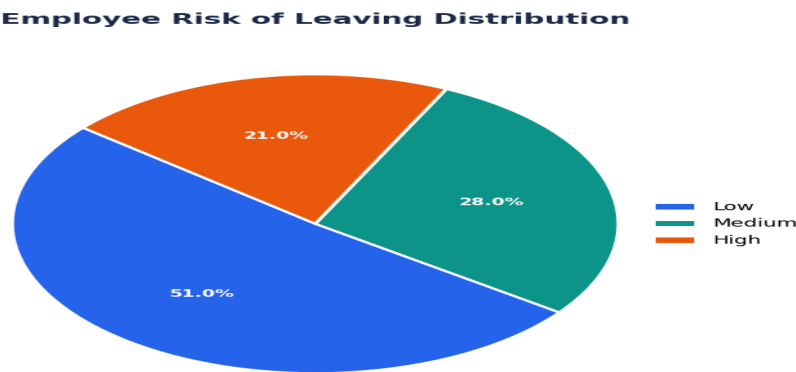

Figure 6: Risk of leaving segmentation across surveyed employees

Key Insight: Manager Satisfaction (2.92) and Career Growth Score (2.92) are the two lowest-rated dimensions — both below the 3.0 threshold. Recognition (3.06) and Work-Life Balance (3.03) are marginally above target but still require attention. With 63 employees classified as High Risk, targeted retention conversations are urgent.

4. Learning & Development

A total of **600 training enrolments** were recorded across four categories. The programme achieved a **76.2% completion rate** and delivered a measurable average skill uplift of **+0.94 points** (on a 5-point scale), underpinned by a total investment of **\$1.53 million**.

Figure 7: Training enrolments by category (left) and delivery mode (right)

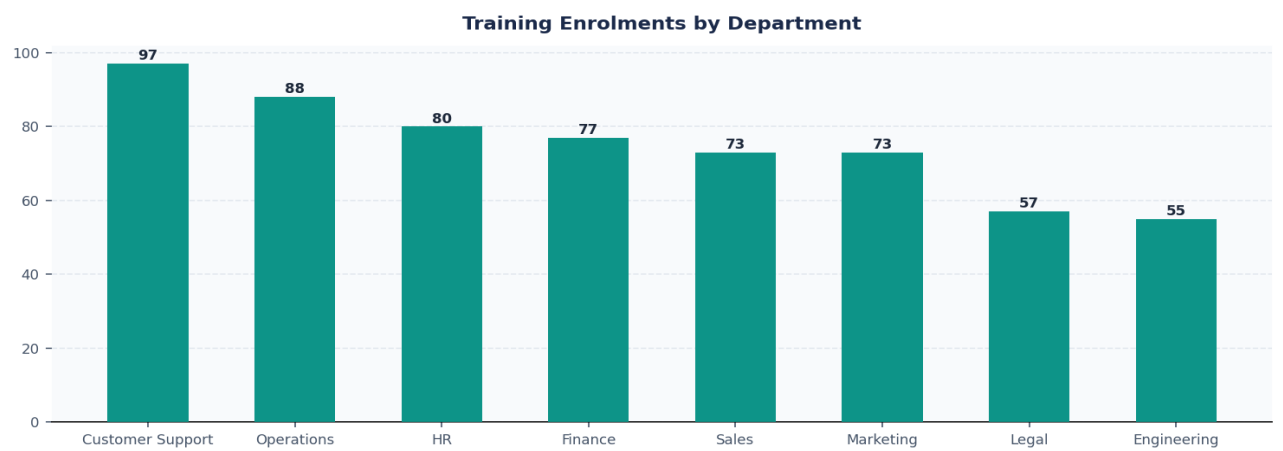

Figure 8: Training participation across departments

Skill Score Summary

Metric	Score
Avg Pre-Training Skill Score	3.01 / 5.00
Avg Post-Training Skill Score	3.96 / 5.00
Average Skill Improvement	+0.94 pts (31.2% gain)
Average Manager Rating	4.02 / 5.00
Average Assessment Score	80.3%

Average Training Duration	42.4 hours
Average Cost per Enrolment	\$2,555

- **Key Insight:** Customer Support (97) and Operations (88) lead participation. Compliance training is the largest category (163 sessions), indicating regulatory focus. External trainers show marginally higher post-skill scores. The 23.8% in-progress rate represents an opportunity to improve completion tracking.

5. Strategic HR Action Plan

Based on the data analysis, eight strategic focus areas have been identified with recommended actions, priority levels, and projected impact.

#	Focus Area	Key Finding	Recommended Actions	Priority	Impact
1	Attrition & Retention	123 terminations; Low Compensation (15%), Career Growth (12%), Management Issues (10%) top reasons in Finance & Engineering.	Benchmark compensation · Implement stay interviews · Develop career pathing	CRITICAL	HIGH
2	Employee Engagement	Avg engagement 2.9/5.0 with 21% high-risk employees and low recognition (3.1/5.0).	Launch retention initiatives for high-risk staff · Peer recognition programme · Quarterly pulse surveys	CRITICAL	HIGH
3	Learning & Development	76.2% training completion rate; +0.94 skill improvement; \$1.53M investment.	Target 90% completion rate · Focus on high-impact programmes · Link training to performance reviews	HIGH	HIGH
4	Performance Management	Manager ratings average 4.0/5.0 across 500 employees in 9 departments.	Conduct rating calibration sessions · Create PIPs for bottom 10% · Offer high-performer bonuses	HIGH	MEDIUM
5	Work-Life Balance	Work-Life Balance scores average 3.2/5.0; lowest in Operations and Customer Support.	Pilot flexible work in low-scoring depts · Review workload distribution · Enforce mandatory PTO	HIGH	MEDIUM
6	Succession Planning	15% senior role turnover creating succession gaps in 18% of leadership positions.	Identify 2–3 successors per critical role · Accelerate leadership programmes · Pair mentors with HiPos	HIGH	HIGH
7	Diversity, Equity & Inclusion	5 ethnic groups represented; 46 D&I; programmes completed at 82% avg score.	Set measurable diversity targets · Achieve 100% D&I; training completion · Use blind recruitment	SUSTAIN	POSITIVE
8	Workforce Productivity	Young workforce (0.74 yr tenure) with 31% skill improvement post-training.	Use external trainers for specialised skills · Accelerate onboarding · Create knowledge transfer protocols	SUSTAIN	POSITIVE

■ 6. Key Takeaways & Recommendations

The following summarises the most impactful findings from this project and the concrete actions the HR team should prioritise.

■ Workforce Composition

Healthy diversity across gender (54.8% female), ethnicity (5 groups), and education (43.4% Bachelor's, 33.2% Master's). The workforce is predominantly full-time (81.4%) and geographically distributed. Average tenure of 0.74 years suggests significant recent hiring activity requiring strong onboarding support.

■ Attrition is a Priority Risk

24.6% overall attrition rate with Engineering and Finance most affected. Low Compensation is the #1 cited exit reason (17.1%). Immediate action required: compensation benchmarking, structured career pathing, and manager effectiveness training to stem the ongoing departure rate.

■ Engagement Needs Structural Improvement

Overall engagement of 3.0/5.0 is borderline. Manager Satisfaction (2.92) and Career Growth (2.92) are below the 3.0 threshold. With 21% of surveyed staff at High Risk of Leaving, a targeted retention campaign — especially for mid-level and senior employees — is critical within the next 90 days.

■ Training is Delivering ROI

\$1.53M investment has generated a 31% average skill improvement. The 76.2% completion rate and 80.3% assessment scores are positive, but a 23.8% in-progress rate signals incomplete programme follow-through. Prioritise completion of in-progress training and set a 90% completion target.

■ Succession & Leadership Gaps Must Be Addressed

15% senior-level turnover has created succession gaps in 18% of leadership positions. The organisation should identify 2–3 successors for every critical role, accelerate leadership development for high-potential employees, and implement mentorship pairings to protect institutional knowledge.

■ DEI Progress is Strong — Sustain the Momentum

5 ethnic groups represented across 8 locations. 46 D&I training sessions completed at an 82% average score. To build on this foundation: set measurable diversity recruitment targets, achieve 100% D&I training coverage, and adopt blind recruitment practices to reduce unconscious bias in hiring.
